BULLCONCEPT® HYBRID

Continuous high-performance flooring Bullconcept Hybrid. Bullconcept® Hybrid is a continuous paving system that does not require expansion joints, not even perimeter ones.

In addition to this, Bullconcept® Hybrid is free from cracking as the nature of its materials makes it impossible. It is an elastic, waterproof pavement with the option of anti-slip finish c2/c3.

To ensure compliance with European health standards, it will be sufficient to carry out perimeter tasks, avoiding any type of joint where bacteria could accumulate. Thus, we combine the best of each technology to provide value to our finished product, where mechanical and aesthetic performance stands out above the rest of continuous flooring options.

Living Bakkali restaurant

Furthermore, the Bullconcept® brand is a state-of-the-art continuous hybrid flooring, which does not belong to the group of hard cementitious materials (microcement, self-leveling, or concrete) nor to the light ones (epoxy, vinyl, carpets, parquet, etc.)

APPLICATION

Within a complete line of systems, both indoors and outdoors, the star is the continuous flooring Bullconcept® Hybrid, where high resistance, low maintenance, and an infinite variety of aesthetic finishes are combined, undoubtedly adapting to all types of designed environments.

It can be applied in interior and exterior areas, vertically, and even on furniture.

Bullconcept® Hybrid vertical

Bullconcept® Hybrid on furniture

Bullconcept® Hybrid outdoors

FEATURES

The main features of the Bullconcept® Hybrid continuous flooring are:

No cracking	Waterproof flooring for easy cleaning
Warm and quiet underfoot	High impact resistance
Excellent performance and easy installation	Outstanding cost-effectiveness
Option for anti-slip finish c2/c3	Customized colors and designs

The system developed by Bullconcept® Hybrid is quickly ready for use, reducing execution times compared to other continuous products by 4 to 5 times their installation time. Bullconcept® can accomplish 500m² to 1000m² in less than 72 hours.

INSTALLATION

Bullconcept® is ideal for the execution of your new project or the renovation of your existing flooring. It is suitable for comfortable new construction homes or renovations, as well as large-scale projects in hotels, hospitals, schools, franchises, commercial spaces, and ultimately, in public buildings of any kind. It is even suitable for industrial environments, where the need for periodic painting maintenance is minimized.
